

THE WEATHER REPORT

Forecasts and Records of the Last Twenty-four Hours.

Washington, April 24.—Temperatures are up in the north Atlantic states and the south Rocky Mountain region, while unusually warm weather continues in the Middle West, the Ohio Valley and the region of the Great Lakes. As a number of points in Michigan the highest temperature ever recorded in the month of April was reported Saturday afternoon.

There were widely scattered showers in the last twenty-four hours in Texas, the plains states, the Rocky Mountain region, and the south and far west weather observers elsewhere. While the exception of widely scattered showers in the plains states and the Rocky Mountain region, the weather will be generally fair throughout the country Sunday and Monday.

The temperature will rise Sunday in New England and on the Atlantic coast. It will change little elsewhere during the next forty-eight hours. Winds for Sunday and Monday: North Atlantic and Middle Atlantic, right to moderate variable, moderate to strong; Gulf of Mexico, variable, except east on the Florida coast; East Gulf, moderate to fresh east and southeast; West Gulf, fresh to strong east and southeast; Upper Lakes, moderate south on Michigan and Huron; light to moderate variable on Superior; Lower Lakes, moderate southwest.

Forecast for Special Localities.—Eastern New York, New Jersey, eastern Pennsylvania, Delaware, Maryland, the District of Columbia, western New York and western Virginia, fair to day and to-morrow.

Northern and southern New England, partly cloudy and warmer than Saturday.

Local Offer Returns.—The following official record from the Weather Bureau shows the changes in the temperature for the last twenty-four hours in comparison with the corresponding date of last year:
